

# HAVE A BASEMENT APARTMENT IN YOUR HOME?

## Young woman looking for a semi-independent living opportunity!

You could help a Supportive  
Independent Living Opportunity!

A young woman is looking for a supported apartment in Kitchener. She is eager to transition to a more independent living opportunity, while still having daily supports.

She wishes to live in the home of the support person, in a completely separate unit (like a basement apartment) where she can receive daily check-in's and meals.

Support and coordination through EAFWR will help ensure regular rent payments and oversight to the support relationship.

This is an exciting way to help someone create a new living opportunity and take the next step towards living on her own.
